One item Ana and I were discussing was asking Janine MacGregor from NJDEP to speak a few minutes on the recent court decision in a case brought by NJ against Tierra and Occidental Chemical related to liability for the cleanup and restoration of the River. We were wondering how this impacts or relates to what we are looking at. I have not asked her yet, so let me know if we can squeeze this in.

Thanks Alice, that timing seems fine though Hudson may generate a lot of questions.

We also need to do some general administrative stuff on membership and co-chairs, but we can do that at the end so it does not intrude on the substantive issues.

thanks

Doug

Thanks. FYI: timing for the September meeting should be:

- Tierra presentation about 30min;
- Victor introducing his SuperJTI issue about 10 min;
- About 20 min of questions on Tierra presentation and reaching consensus on SuperJTI liason;
- Lessons learned on Hudson presentation about 30 min;
- About 30 min for questions/answers on Hudson.

If you would like different timing for any of these, please let me know ASAP and I will pass on to speakers.

Hi all,

I moved last week so am just catching up on email. This schedule looks good.

thanks

Doug

I sent the following message yesterday to Doug alone, because I'm afraid I had lost track of who exactly is co-chair (sorry!). I have not heard back from Doug yet - perhaps you could discuss and advise next week.

Subject: 9/8 Passaic River CAG meeting

I tried to call, but wasn't sure if I had the right number...

For the 9/8 CAG meeting, we had the following topics on the agenda:

- Lessons Learned from Hudson River; and
- Introduction to the contamination and movement of contaminants in the Passaic River system.

However, Elizabeth Butler just asked if she could have a significant amount of time on the agenda for Tierra to present progress on the Removal and for Victor to bring up an issue related to SuperJTI.

Since there is a lot going on related to the Removal right now, I would propose to alter the CAG schedule as follows:

For the 9/8 meeting:

- Tierra presentation on Removal progress.
- Victor's SuperJTI issue (CAG is supposed to designate a liaison to work with EPA HQs SuperJTI personnel).
- Lessons Learned from Hudson River.

For the 10/13 meeting:

- Introduction to the contamination and movement of contaminants in the Passaic River system.
- Understanding human health and ecological risk assessments and how they are used in decision making.

I have discussed the risk assessment presentations for the 10/13 meeting with the people who will be doing them, so I know there will be enough time for both of these topics.

Please let me know what you think.
